

GASTÓN VALLES

FULL STACK DEVELOPER

 (+54) 251 694-8143

 gastonvallesyeou@gmail.com

 San Juan 1511,
Mendoza - Argentina

I am a passionate Full Stack developer with a strong interest in technology and software development. My experience has been focused on web development using technologies such as React, Redux, Node.js, and PostgreSQL. I have worked on personal and group projects where I have demonstrated leadership skills, as well as design and development skills for web applications. I am a self-directed individual who prioritizes quality and efficiency, and I enjoy working in teams to achieve common goals. I am currently seeking opportunities to apply my skills and continue learning and growing as a developer.

EDUCATION

03/2022 - 01/2023

Henry Intensive Bootcamp

Full Stack Developer

02/2014 - 12/2017

High School Abelardo Vázquez

Accounting Bachelor

SKILLS

- HTML & CSS (Advanced)
- JavaScript (Advanced)
- React (Advanced)
- Redux (Intermediate)
- Node.js (Advanced)
- PostgreSQL (Advanced)
- Bootstrap (Intermediate)
- English (C1 - Advanced)

PROJECTS

Portfolio

01/2023 - Present

My portfolio is a fully responsive Single Page Application (SPA) made with HTML, CSS, and vanilla JavaScript. It features a dark mode, animations, and adaptability for any device, with the latter being a difficulty that I solved with media queries.

Youpet

11/2022 - 12/2022

It is a group project and website for the management of shifts with different veterinarians. Users can register and log in to book appointments and make payments. Additionally, they can filter the different veterinarians according to their specialty and add them to a favorites list for each user. My main contribution was leadership and organization of the team, as well as designing the database, backend routes, and minor fixes in Bootstrap.

Countries Individual Project

09/2022 - 10/2022

Website to list all countries in the world, with the possibility of filtering, searching, viewing their respective details and, finally, the ability to create tourist activities in one or several countries simultaneously. Technologies used include React, Redux, CSS Modules for frontend, Node.js and Express.js for backend, and PostgreSQL and Sequelize for the database.
