Projects

Portfolio

Full responsive portfolio made with HTML, CSS and JavaScript. It has animations made in vanilla CSS and dark theme.

Youpet

Website for management of shifts with the different veterinarians, for users who register and perform the subsequent login, making payments for book appointments, filtering the different veterinarians according to their specialty and the possibility of adding them to a list of favorites for each user.

Countries Individual Project

Website that displays the different countries of the world, with the possibility of filtering them, search, seeing their respective details and, finally, the ability to create tourist activities to one or several countries simultaneously.
