GASTÓN VALLES

FULL STACK DEVELOPER

San Juan 1511, Mendoza - Argentina • (+54)261-694-8143 • gastonvallesyeou@gmail.com • https://www.linkedin.com/in/gastonvalles/

I am a passionate Full Stack developer with a strong interest in technology and software development. My experience has been focused on web development using technologies such as React, Redux, Node.js, and PostgreSQL. I have worked on personal and group projects where I have demonstrated leadership skills, as well as design and development skills for web applications. I am a self-directed individual who prioritizes quality and efficiency, and I enjoy working in teams to achieve common goals. I am currently seeking opportunities to apply my skills and continue learning and growing as a developer.

PROFESSIONAL EXPERIENCE

Personal Portfolio   01/2023 – Present
Full Stack Developer
- Designed my personal portfolio using Figma to create a Single Page Application (SPA) with HTML, CSS and vanilla JavaScript. This project showcases my web design and development skills, demonstrate my commitment to staying up-to-date with the latest technologies.
- I ensured my personal portfolio's adaptability to different devices by making it fully responsive using media queries.
- Added a dark mode feature and project carousel that redirects to the corresponding repository and/or deployed project link.

Youpet (Henry)   11/2022 – 12/2022
Full Stack Developer & Team Lead
- Created the tables and established the relationships for the SQL database design.
- Developed backend routes, resolved compatibility issues with libraries, assisted my colleagues with Git flow, and delivered a comprehensive website presentation to the client.
- I led my team, delegated tasks to my team members, and proposed best practices to ensure project organization and efficiency.

Countries Individual Project (Henry)   09/2022 – 10/2022
Full Stack Developer
- Designed, developed, and optimized a website that lists all countries in the world, featuring filters, search bar, and the ability to create tourist activities in one or multiple countries simultaneously.
- I utilized React and Redux for the frontend, Node.js and Express.js for the backend, and PostgreSQL and Sequelize for the database to develop this project.
